

20CS6T04 – Mobile Computing

UNIT 1: Mobile Communication Basics

Introduction

Mobile computing enables communication on the move.

Detailed Explanation

Concepts

Cellular networks.

Applications

Used in smartphones.

Summary

This unit explains basics.

UNIT 2: Wireless Networks

Introduction

Enable wireless communication.

Detailed Explanation

Technologies

Wi-Fi, Bluetooth.

Applications

Used in networking.

Summary

This unit explains wireless networks.

UNIT 3: Mobile IP

Introduction

Supports mobility.

Detailed Explanation

Concepts

Home and foreign agents.

Applications

Used in mobile systems.

Summary

This unit explains mobile IP.

UNIT 4: Mobile Application Development

Introduction

Develops mobile apps.

Detailed Explanation

Platforms

Android, iOS.

Applications

Used in app development.

Summary

This unit explains mobile apps.

UNIT 5: Security in Mobile Computing

Introduction

Ensures mobile security.

Detailed Explanation

Threats

Malware.

Solutions

Encryption.

Applications

Used in mobile systems.

Summary

This unit explains mobile security.
