

20CS7T03 – Internet of Things

UNIT 1: IoT Fundamentals

Introduction

IoT connects devices for data exchange.

Detailed Explanation

Concepts

Smart devices and connectivity.

Applications

Used in smart homes.

Summary

This unit explains IoT basics.

UNIT 2: Sensors and Devices

Introduction

Sensors collect data.

Detailed Explanation

Types of Sensors

Temperature, motion sensors.

Applications

Used in monitoring systems.

Summary

This unit explains sensors.

UNIT 3: Communication Protocols

Introduction

Protocols enable communication.

Detailed Explanation

Protocols

MQTT, HTTP.

Applications

Used in IoT systems.

Summary

This unit explains protocols.

UNIT 4: IoT Architecture

Introduction

Defines system structure.

Detailed Explanation

Layers

Perception, network, application.

Applications

Used in IoT design.

Summary

This unit explains architecture.

UNIT 5: IoT Applications

Introduction

IoT is widely used.

Detailed Explanation

Applications

Smart cities, healthcare.

Applications

Used in real-world systems.

Summary

This unit explains IoT applications.
